Getting started with RefWorks

http://unihub.mdx.ac.uk / study / library
What is RefWorks?

- Bibliographic management software
- Available online from Library website: http://unihub.mdx.ac.uk/study/library
- Collect, store and organise references
- Create Bibliography
- Access from any computer

http://www.flickr.com/photos/milagraceari/4618671983/
In order to access RefWorks log into MyUnihub

You can register for password reset in case you forget your login details.
Select ‘Databases’ from the list of electronic resources.
From our list of databases select:
R > RefWorks > Enter Database here
The first time you use RefWorks, you will need to register.

Enter your email address, select options from the drop-down menus, type in security words and ‘Create Account’.
You are now ready to start using RefWorks
First of all create a folder

New Folder > Give the folder a name eg. Project Research > Create

You can create more than one folder, so that you can organise your references
Your new folder is here

The new folder is empty i.e., no references have been added yet.
