Accessing electronic resources from home

http://unihub.mdx.ac.uk/your-study/library-and-it-support
In order to access our e-resources always log-in to MyUnihub
This validates you as one of our students and means that you should be able to access our electronic resources.

However sometimes unexpected things happen, so have a look at the following slides for some helpful solutions.
You may see this screen

This is the Middlesex University login page.

For some reason logging in to MyUniHub has not enabled direct access to the e-resource you want to view, so you will need to log in again.

Log in using your computer network/UniHub username and password. You will then be able to access the e-resource.
If you see this screen.....

......look for an ‘Athens login’ link and click. This should take you to the Middlesex University login page (see previous slide).
If you see either of these screens then...

....click on ‘Alternative Login’. You will then need to select your institution (see next slide).....
....find your organisation by....

....selecting ‘Middlesex University’ if displayed or....

....searching for ‘Middlesex University’ or....

....scrolling down the page and (see next slide)....
...select ‘Universities’ and then ‘Middlesex University’ and click on ‘Go to the Middlesex University login page’. You can then log on using your computer network/UniHub username and password.
You may see this screen when you try to access a database. If you do then...

...type ‘Middlesex’ here and then select ‘Middlesex University’ from the list (next slide)....
.....you will then be asked to log in.....

....click on ‘Go to the Middlesex University login page’....

....then use your computer network/UniHub username and password to login in.
